## SUMMARY

Currently working as a Developer Associate at TD. Graduated in the Systems Analyst program at Sheridan College with High Honors (GPA 3.94). Experience working as a developer and eager to learn.

## WORK HISTORY

**Developer Associate**                                                                01/2020 – present
*TD Bank*                                                                              *Toronto, ON - Canada*
- o  2 rotations in Deposit Account System
- o  Develop tools in Python, JCL and SAS
- o  Assist with package handling, helping developers to transfer their changes from dev to production environments using Endevor and ServiceNow
- o  Develop features for TD Gigs using Angular, NodeJS and MySQL

**Python Developer Research Assistant**                                                09/2019 – 12/2019
*Sheridan College*                                                                     *Brampton, ON - Canada*
- o  Responsible for the design and development of a Dashboard for data visualization in real time
- o  Develop using Python with Tkinter
- o  Create a native Android mobile app version
- o  Data stored and retrieved from a MySQL database

**Jr. Web Developer and QA Analyst (2 co-op terms)**                                    05/2019 – 08/2019
*Government of Ontario*                                                                 09/2018 – 12/2018
                                                                                       *Toronto, ON - Canada*
- o  Implement new features and support most components of an intranet, which included front-end created in Vue, back-end using PHP with customized Wordpress, and an API written in GoLang
- o  Write and improve SQL queries for retrieving data accurately and efficiently
- o  Work with Docker and Vagrant for creating and debugging code in a local environment
- o  Develop automated test scripts using Selenium, Codeception and Bamboo

**Co-op Developer**                                                                     01/2018 – 04/2018
*HitGrab Game Labs*                                                                     *Toronto, ON - Canada*
- o  Develop a multiplayer word game prototype
- o  Front-end written with JavaScript and jQuery, back-end with NodeJS and MongoDB
- o  Use TeamWork to organize the project deliverables in an Agile way

**Peer Assisted Learning Leader for Computer Math**                                    09/2017 – 12/2017
*Sheridan College*                                                                     *Oakville, ON - Canada*
- o  Plan, prepare and conduct one-hour sessions weekly where the most important topics given in class are revisited and practiced
- o  Encourage class's participation and guide the students towards the solution

## Projects

***Capstone – Bike Loan for Sheridan HMC Campus (awarded 1st place)***

Web application that would allow Sheridan Bike Hub to manage their Bike Rental program by registering customers and keeping track of inventory and rentals, as well as managing any late returns.
- o  Front-end developed using Angular.
- o  Back-end is a RESTful API using Spring Boot with Hibernate, having PostgreSQL for the RDBMS
